Notes

What to See in Tucson

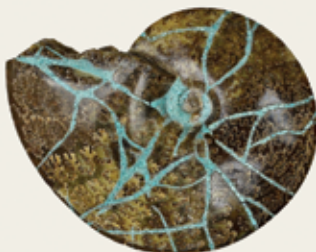

Many of the AAPS dealers have new locations this year. Please see the Dealer Contact Information on pages 34-45 for their current locations

Triebold Paleontology has one of their new mounted Mosasaurs on display at the Tucson 22nd Street Show booth D32. They always have something new, visit their ad on pages 18-19.

Anthony Lindgren, Lindgren Fossils LLC has a new Fossil Turtle from the Green River Formation near Kemmerer Wyoming and many other Eocene fossils at their new location at the Mineral & Fossil Marketplace Container-14. Stop his container and visit the other dealers at that show. See the Marketplace Ad on pages 12-13

Bob Carroll, Black Cat Mountain Trilobites is also at the Marketplace, a new location for 2022. He is at Booth 4 in the main building. His finely prepared trilobites are always in demand.

One of the locations that is a must see, is the Co-op located at 1635 North Oracle. Home to many Fossil Dealers Neal Larson of Larson Paleontology has been exhibiting there for a few years but has a new gallery space this year and will have many fine ammonites such as this Turquoise inlaid specimen. Visit the Co-op ad on page 47

One of the most overlooked sources of material, is the annual AAPS auction during the annual meeting of the Association. Held at the University of Arizona on Saturday February 5th, 7:00 pm. This year, in addition to the PaleoBOND Lab Coat there will be dozens of Fossils, Replicas, Collectables, and specimens such as this piece of Indonesian Chromium Green Petrified Wood to bid on. A new find, you can possibly own this specimen.

Please see the notice on page 10 for more information. Reservations for the dinner must be made in advance call 435-744-3428

President's Message

On behalf of the Association of Applied Paleontological Sciences (AAPS), I want to welcome you back to the Tucson Gem, Mineral & Fossil Show. Many of the top dealers at the event are members of the AAPS and are featured in this edition of the annual AAPS Tucson Show Guide. Please peruse the content of the booklet and be sure to patronize our dealer members and advertisers. As members of AAPS, we share a common respect for Paleontology and adhere to a Code of Ethics that applies to all of us involved in the science, business, or hobby of fossil collecting, preservation, and education. As a "fossil not collected is a fossil not protected" to put it simply, we support proper, legal, and ethical fossil collecting to ensure that our natural history is safeguarded for future generations. I encourage you to get involved and get active.

As benefits to our members, AAPS offers an annual banquet and auction during the show as well as our keynote lecture. Our speaker this year will be Andre Lujan, of Paleotex, LLC, and proprietor of the Texas Through Time Museum in Hillsboro, Texas. The topic this year will be "Commercial Paleontology and the Future of Museums" of which Andre is certainly an expert. In addition to the presentation, noted author Thomas Wiewandt will be offering and signing copies of his book "FOSSILS INSIDE OUT: A Global Fusion of Science, Art, & Culture" which is a great resource for any fossil enthusiast. The doors to the event will open at 6PM with the book signing taking place until the presentation begins at 7PM. This year, we will gather at the new show hosted by promoter Sandra Gonzalez at the La Quinta Inn & Suites by Wyndham located at 102 E. Alvernon Way. This is a new venue for AAPS which has been at the YWCA in past years. Be sure to mark your show calendars for Friday, February 4, 2022, when this event will be taking place. The lecture and book signing event is free, but seating is limited, so please sign up to attend that night.

Of course, the major event for our organization is the awards banquet and auction which will, again, be held at the Student Union

of the University of Arizona located at 1303 E. University Boulevard in Tucson. Due to the ongoing pandemic, masks will be required for attendees upon entering the ballroom and are to be worn at all times except when eating or drinking. Our scholarship and grant recipients as well as a number of prestigious Charles Sternberg medal awards will be announced. It will be my great honor and privilege to award those medals to the worthy recipients including two winners from last year when we could not hold an event as usual. We will be raising funds for AAPS with an exciting auction that evening. Please be sure to get your ticket and join us on Saturday, February 5, 2022, for a night of fun and fossils!

While the Tucson Show is never quite the same any consecutive years, there are some major changes in the event this year, namely that there will be no show at the Hotel City Center (Inn Suites as we all have continued to fondly refer to it over the years) as the hotel has been sold. Please use this Show Guide for information on where dealers who have previously shown there will be located this year. This booklet is full of dealer listings and advertisements providing detail on where those dealers will be set up this year. I anticipate a wonderful Tucson Show and encourage you to join AAPS, if you are not already a member.

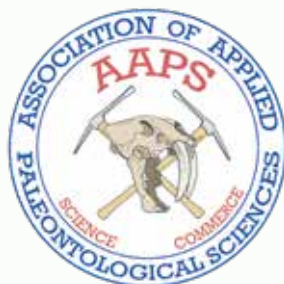

I wish you a happy, healthy, and prosperous 2022. While I am optimistic the Tucson Show will go on and be great, AAPS will keep its members informed of any changes due Covid-19 via our periodic newsletter. I look forward to seeing you in the beautiful Arizona desert in February and hope you find your treasure.

Craig C. Kissick

A special thank you to all the advertisers who make this guide possible. All of the income from advertising, is used to develop, print and distribute the copies at many of the major fossil and mineral shows throughout Tucson, including the Welcome to Tucson tables at the Tucson International Airport.

I want to thank Paul Haman with Bone Clones Inc. for reviewing the cover designs and offering his expertise with the guide layout. I also want to thank Michelle Bonito and the staff at Arizona Lithographers for the service they provide in printing the AAPS Guide for us each year. Finally a special thank you to James Neff who helps with the guide distribution.

Events of Special Interest to Fossil Enthusiasts

Thursday January 27 - February 13, 2022, open daily 10 am - 6 pm

22nd Street Show opens (Eons Expositions, RLLLP) Many well-known Fossil and Natural History Dealers in attendance. **See ad on Page 26-27.**

Friday January 28 - February 13, 2022

RMGM Mineral and Fossil show opens at two new locations The Oracle Road tent is located at 1920 N Oracle Road, there are a number of Fossil Dealers at this location including Korite International. The La Quinta Show is located at the La Quinta Inn at 102 N. Alvernon way. The AAPS Lecture Series and Book Signing will take place at the La Quinta Inn this year. **See their ad and dealer lists on pages 20-21.**

Friday January 28 - February 12, 2022, 10 am - 6 pm daily

Fossil & Mineral Alley at the Days Inn by Wyndham open their doors. There are many well known fossil dealers at this location.

Friday January 28 - February 13, 2022, open 10 am - 6 pm daily

The Mineral Fossil Co-op opens their doors. For a list of the dealers at this location, **see their advertisement on page 47.**

January 29 - February 12, 2022, open daily 10 am - 6 pm

Mineral & Fossil Market Place opens. A number of well-known fossil dealers including PaleoTools, Custom Paleo and Warfield Fossils in attendance, Black Hills Institute has moved to this location. Plenty of free parking.

See advertisement on pages 12-13.

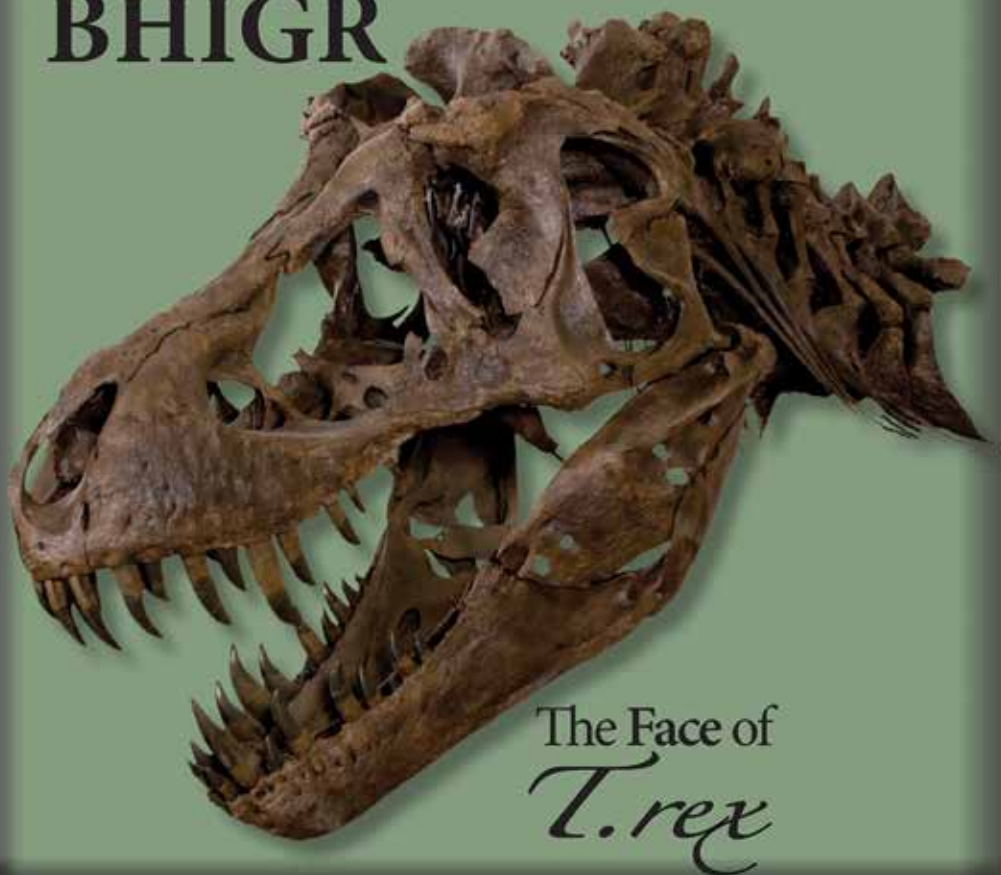

Friday February 4th – 6:00 pm

AAPS Book Signing and Public Lecture, doors open at 6 PM for a book signing by author Thomas Wiewandt. Copies of his book Fossils Inside Out will be available for purchase. At 7 PM Guest Speaker Andre Lujan will discuss "Commercial Paleontology and the Future of Museums". The public is welcome, limited seating. New Location, Sponsored by AAPS and Hosted by RMGM Promotions at the La Quinta Inn – Reid Park, 102 N. Alvernon Way in the Montezuma Room. **See pages 22-23.**

Saturday February 5th – 6:00pm

Annual AAPS Dinner/Auction, the Public is invited. Held at the University of Arizona Student Union building, 3rd floor North Ballroom. Cash Bar, Reservations and meal payments must be made prior to the close of business on Wednesday February 2nd. Call 435-744-3428 during the show for more information and to reserve your meal. **See map on page 10.**

AAPS Scholarships and Grants

The Association of Applied Paleontological Sciences (AAPS) offers two \$1000 scholarships to graduate level students in paleontology attending universities worldwide and four \$1000 grants. All the scholarships and grants are awarded to the applicants by the Board of Directors. Applications for these programs must be received by **December 1st** to be considered by the AAPS Board for the following year.

For more information, please visit our website www.aaps.net

James R. Welch Scholarship

The James R. Welch Scholarship is awarded to graduate level students who study and work on macro invertebrate fossils. AAPS initiated this scholarship in 1990 to encourage students interested in paleontological invertebrate studies.

Charles Sternberg Scholarship

The Charles Sternberg Scholarship is awarded to graduate level students who study and work on macro vertebrate fossils. AAPS initiated this scholarship in 1991 to offer encouragement to students in vertebrate studies.

A. Allen Graffham Research Grant

The \$1,000 Grant is awarded to a select researcher that publishes on specimens collected by, or in collaboration with, AAPS members. AAPS offers this research grant annually to a scientist, researcher, or student in paleontology.

René M. Vandervelde Research Grant

The \$1000 Grant is available to qualified researchers working on the marine paleontology, geology, or stratigraphy of the Late Cretaceous Pierre and Bearpaw Shales of North America. Through this grant, Korite® International hopes to encourage scientific research and publications on the fauna from these deposits.

Dan Rigel Memorial Educational Grant

This grant worth up to \$1,000 will be awarded to a High School teacher(s) or High School educator to promote the education of their students in geology and paleontology.

William H. Mason III Preparators' Grant

This grant was created to assist both academic and commercial preparators working on fossil or meteorite specimens that will be displayed in a public museum or will become part of a permanent research collection.

Applications should be addressed to:

AAPS Lecture Series & Book Signing

Friday February 4th 6 PM

Hosted by RMGM Promotions, at the La Quinta Inn - Reed Park
120 N. Alvernon Way, Montezuma Ballroom

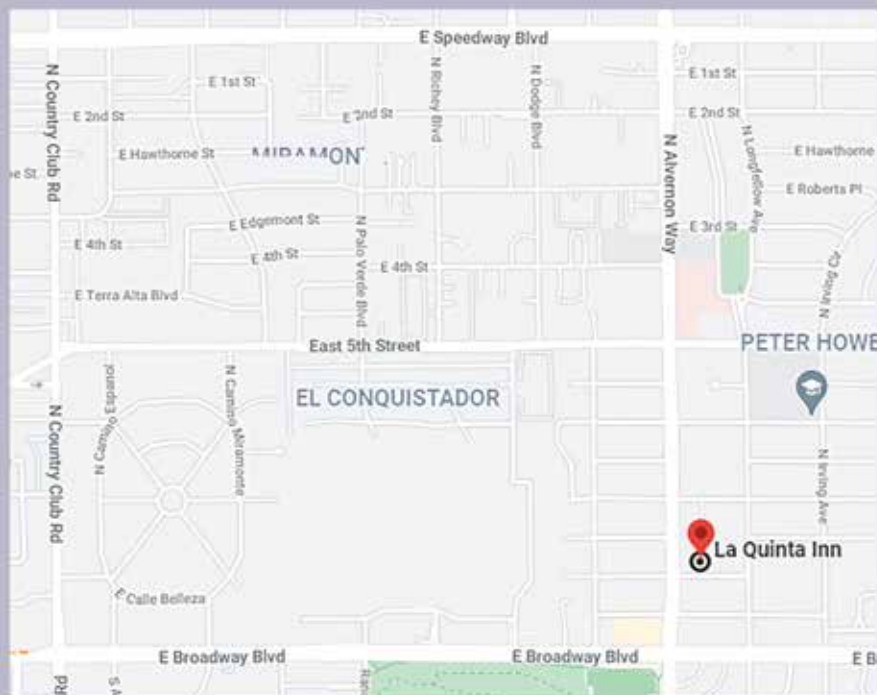

Guest Speaker Andre Lujan

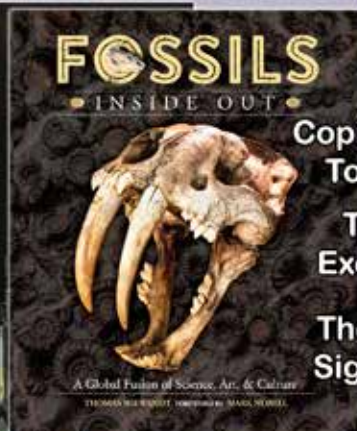

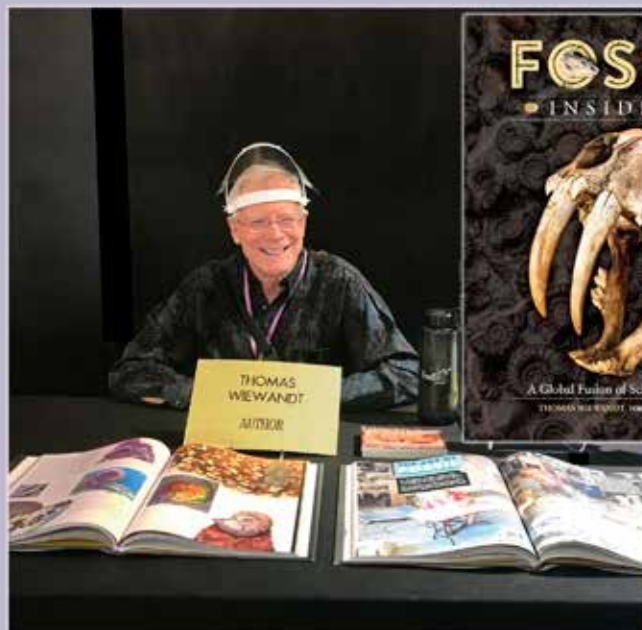

"Commercial Paleontology and the Future of Museums"

Andre Lujan is president of PaleoTex LLC and Executive Director of Texas Through Time. His love of dinosaurs and all things paleontology began at the young age of 4 with a trip to dinosaur valley state park. It has taken him on many paths to where He is today. He is a guest speaker at schools and libraries across North Texas. His pursuit of new discoveries has taken him to every hot bed of fossils in the nation, from the rivers and beaches of Florida to the badlands of Montana, the Dakotas and the deserts of west Texas as well as the world-famous Texas Red Beds.

AAPS ADVOCATE 2020-2022

Dr. Kendal Martyn wearing the PaleoBond Lab Coat

Since 1995, the Paleo Bond Lab Coat has been auctioned off over 27 times and has traveled home to nearly a dozen different states as well as Morocco and the UK, always returning to be re-auctioned. During the 2017 annual meeting and auction in Tucson, Neal Larson, Past-President of AAPS recommended that we honor the person or company that successfully bids on the Paleo Bond Lab Coat and the designation of AAPS Advocate was born. Dr. Kandel Martyn and Moussa Minerals and Fossils were the successful bidder on the PaleoBond Lab Coat during the 2020 auction.

Interest in fossils began when Moussa founder Brian Eberhardie was about 9. His school had some glass cabinets containing a small Victorian collection which just fascinated him. Family connections on the Isle of Wight led to hours hunting the fossiliferous cliffs for echinoids, ammonites, Devil's toenails", gypsum crystals & marcasite nodules.

He made His first tour of Morocco in the mid 80's, a time of classic mineral finds in Touissite & Mibladen and the start of extensive fossil collecting from the Sahara. He returned twice a year and Moussa was born. Enquiries with the locals on his 3rd trip bore fruit, and after a wild Berber nomad tent chase above the Dades gorges in the Hight Atlas Moussa obtained their first mobile shop. The tents became a feature of the UK music festival scene for a couple of decades - slowly getting larger and more elaborate - a regular feature was a big hands-on display for kids who would hang out for hours while their parents watched the music, danced, and did boring adult stuff. Many visitors to the Tucson show would have seen one tent incarnation sitting out from of the Inn Suites lobby.

Moussa has been fortunate and blessed with many great people who have come to work alongside Brian. Sister Helen regularly helped at Tucson & Denver shows in the early years. In the late 90's Dr Kendal Martyn joined the company, bringing welcome background in geological sciences. He has been part of Mousa's team ever since.

Moussa's journey has enjoyed plenty of stimulus & cross fertilization with the paleo-sciences: Pete Lawrance, former curator at Norwich Museum who infected Brian with his love of trilobites and enthused him about exploring the fast-developing fossil locations in Morocco. Richard Fortey & Brian Chatterton - kind enough to name a Moroccan cyphaspid trilobite after Brian. Dale Russell, Des Collins, Angela Milner, Alexander Kellner, Paul Barrett, David Evans, Oliver Rauhut & Dave Rudkin have all given valuable information on material Moussa handled. Articles have been written, locations excavated, and specimens housed in institutions on the back of the connections made and cultivated through the Tucson show.

The company has come a long way since their first visit to Tucson in 1989 via the Desert Inn, Executive Inn, Ins Suites and now Kino Park. Moussa are still heavily involved in Morocco, but the Moussa most show visitors see is quite different from the day-to-day activity back in the UK, where their small B2B warehouse is sending minerals, fossils & stones to customers all over the world.

During the 2022 Tucson shows, Dr. Kendal Martyn and the staff of Moussa Minerals & Fossils can be found at the Kino Gem and Mineral Show in Tent 28, located at 2500 East Ajo Way. Visit their website at <https://moussa-minerals.com> and see their Ad on the inside of the back cover of this guide.

Please come to the 2022 AAPS Meeting on Saturday February 5th. You will have a chance to bid of the PaleoBond Lab Coat, support the William H. Mason Preparator's Grant and possibly be the next AAPS Advocate!

AAPS CODE OF ETHICS

1. Strive to stay informed of and comply with International, National, State/Provincial and Local regulations pertaining to collecting activities and general business practices.
2. Obtain permission from landowners or governmental authorities to gain access to collecting sites.
3. Assure that all lands, properties, flora and fauna are left without damage to property or ecology as a result of the collecting activities.
4. Require that fossil materials received from outside collectors are obtained in compliance with the above collecting guidelines set forth by the Association.
5. Report to scientific experts any significant discoveries of scientific or public interest.
6. Strive to place specimens of unique scientific interest into responsible hands for study, research and preservation.
7. Make no misrepresentation as to identity, locality, age, formation, repairs or restoration of paleontological specimens.
8. Members will strive for best business practices in all aspects of business, dealing with customers and other AAPS members in a fair and honest manner and maintaining a good credit standing. AAPS encourages members to follow good ethics but cannot act as a resource to settle disputes between said members or disputes involving customers.
9. Encourage good relations and cooperation with agencies, institutions, and organizations actively involved in paleontological pursuits.

Join AAPS Today!

Membership applications are available online at:

https://www.aaps.net/membership_application.html.

Benefits include great networking, opportunity to attend the annual dinner and auction held in Tucson each year, special membership advertising rates in the annual Tucson Guide to Fossil Dealers and events, and a voice for professional, amateur and academic paleontologists.

The New Bone Wars

by George F. Winters

The term, Bone Wars was penned to describe what was going on in the field and research offices of academic paleontology in the United States during the later portion of the 19th century. Two well-known paleontologists, Professors Othniel Charles Marsh and Edward Drinker Cope were literally feuding in western North America in a battle to collect the most exciting fossil specimens while racing to name new species of dinosaurs, mammals, and reptiles. It was this rivalry between these two men of science that sparked the bone wars. As the science of paleontology and more specifically vertebrate paleontology evolved in the United States, more institutions were created, major museums opened their doors around the country and of course the number of academic paleontologists grew.

Left: O.C. Marsh, Right: E.D. Cope

Throughout the 20th century the number of professional or commercial paleontologists expanded. Once limited to Charles H. Sternberg (pictured left) and his family and a few other individuals such as Robert Lee Craig in Kemmerer Wyoming. Rock shops that sold local fossil specimens were a common sight along many state roads and highways before the major interstate highway system was built. Many academic paleontologists of the time visited these local shops and purchased specimens.

The Society of Vertebrate Paleontology (SVP) was formed in the 1940s, created by academic paleontologists of the time such as George Simpson, Al Romer and Edwin Colbert, to bring together people from all walks of life who loved and worked in the field of fossil vertebrates. Even students and commercial (professional) paleontologists were offered memberships in the SVP. These founders and early members recognized commercial paleontologists as a necessity in field for their exploration and preparation skills and were grateful for the contributions these individuals and companies made.

By the mid 1950's a new breed of pioneers in the field, such as A. Allen Graffham, started collecting and selling fossils. His company, Geological Enterprises (GE) sold a wide variety of fossils (but primarily invertebrates) to universities, high schools, as well as individuals. He donated many newly discovered species and like the Sternberg's, worked closely with paleontologists and as a result was respected by many academics.

In the 1970's, companies like Black Hills Institute of Geological Research (BHI) opened their doors and soon became well known for dinosaurs, mammals, ammonites and other fossil discoveries as well as their innovative abilities in fossil preparation. While many of their best specimens went to many American institutions, they also sold common specimens to collectors at fossil and mineral shows of the time.

Things started to change in the mid to late 1980s. There were a small but vocal group of members of the SVP that were not happy or were jealous with the commercial aspect of vertebrate paleontology and started to let their feelings known at the society's annual meetings. They began to view fossils as almost "sacred objects" and didn't want anyone else (besides themselves) to be able to collect or work with fossils and decided to make their feelings well-known. At the same time, many academic paleontologists such as Robert Bakker, Ken Carpenter, Phil Currie, and others realized the importance and benefit of collaboration with professional paleontologists in the field, such as BHI and GE.

This resulted with a strong anti-commercial and anti-private ownership of "important" fossil specimen clause being added to the society's bylaws and an ethics clause that include, "The barter, sale, or purchase of scientifically significant vertebrate fossils is not condoned unless it brings them into, or keeps them within, a public trust. Any other trade or commerce in scientifically significant vertebrate fossils is inconsistent with the foregoing, in that it deprives both the public and professionals of important specimens, which are part of our natural heritage." New members were expected to agree to this clause. The vertebrate paleontologists that formulated this bylaw and fought to implement it, believed that unless a "important specimen" is given to a "registered repository", it should not be studied and considered "lost to Science". While this was an opinion, it is not a fact. The specimens still exist, and they still can help with answering many questions in the science of paleontology.

Certain members of the SVP chose not to study such specimens, even though accommodations could easily be made to allow scientists to either purchase or be allowed access to specimens in private collections. It should be noted that many other scientific groups such as the "Paleontological Society" in the United States continue to allow for the research of privately owned specimens. Many invertebrate specimens in private collections have been the subject and topic of research papers and books in the United States and such research is often revisited in succeeding papers on the subjects.

In Europe, many specimens in private collections have been and are continued to be studied and published upon. A prime example is the primate, *Darwinius massillae*, from the Eocene of Messel in Germany, the paper was published in 2010. An acceptable system to research privately owned specimens can be created if a consensus is met among academic, professional (commercial) and private collectors.

Many specimens discovered on private property by landowners or professional paleontologists with access to the private land are often only offered to museums and research facilities. Case in point, Big John the *Triceratops horridus* pictured on the cover of this guide. Discovered by Walter Stein in 2014, who with friends and colleagues collected the specimen. Stein had the specimen in field jackets for nearly 6 years. The specimen was widely advertised, seen at shows, on social media, on the PaleoAdventures website; it was not a secret. Even so, not a single academic ever made an inquiry or offered to buy the skeleton. Stein would have been happy to work with any museum and would have bent over backwards to get it into a Museum in the USA. Once he sold the specimen and preparation was completed, it was mounted by Italian team at Zoic Inc, who did a spectacular job. It then sold at auction in Paris for more than 6.4 million dollars.

The outcry from the academic world began and articles condemning the sale were prominent on hundreds of websites. Only after hundreds of thousands of dollars had been invested in the skeleton resulting in a sale for millions of dollars did the scientific community finally pay attention to this specimen. This outcry was similar to the outcry for the sale of Sue the *Tyrannosaurus rex* many years ago, and the nearly two dozen other dinosaur specimens sold in auction over the last three decades. The sale of Sue and several other specimens proves that museums can find the funding to purchase these specimens when they want.

The reality is that professional collectors and dealers have sold or donated thousands of vertebrate, invertebrate, plant and trace fossils to museums and institutions around the world including many type specimens that have been published. Visit the AAPS Journal webpage:

<https://aaps-journal.org/Commercial-Contributions-to-Paleontology.html>

to view the ever-growing list of specimens now in public repositories that demonstrates cooperation is beneficial to science.

Until the academic community and the commercial dealers learn to speak a “common language” in America, there will always be harsh differences of opinion and hard feelings on both sides. If only academic, professional, and private collectors could adopt a spirit of cooperation, we could finally put an end to the “Modern Bone Wars”.

The Association of Applied Paleontological Sciences has always stated that, “a fossil not collected is a fossil not protected”. So, get out there and protect as many fossils as you can!

Introducing the...

Honolulu Show

November 2023

Hawaii Convention Center

- ✿ Combine a Tax-Deductible Business Trip with Pleasure
- ✿ 100,000 Tourists Visit Honolulu Every Week
- ✿ 1+ Million People Live Within 20 Miles of the Venue
- ✿ Hawaii has never had a major mineral & gem show
- ✿ Freight & shipping are less expensive than you expect

The gorgeous Hawaii Convention Center is in the heart of Honolulu and walking distance to hotels, restaurants, and Waikiki Beach. We need 100 dealers to sign-up ASAP so we can lock in the venue and advertising campaign. Visit our website to register for free without obligation. The show will be a "go" when 100 dealers do so. Then you'll choose your booth in the order of your sign-up.

Don't delay – be one of the first 100 dealers.

www.Honolulu.Show

PRODUCTS AND DEALER LOCATIONS

Fossil Dealers and AAPS Members Please Note – If you are not listed in this show guide, and would like to be included in future issues, call our business office at 435-744-3428, and we will mail you the proper form to complete. There is no charge to AAPS members for 4 show location listings. **Visit our website at www.aaps.net**

Readers Note – If there is no location listed next to a dealer's name they are not set up during the shows. Refer to the Dealer Contact Section of this guide for their company information.
